Natural Products - Drug Discovery and Therapeutic Medicine

A natural product is a chemical compound or substance produced by a living organism—that is, found in nature. In the broadest sense, natural products include any substance produced by life. Natural products can also be prepared by chemical synthesis and have played a central role in the development of the field of organic chemistry by providing challenging synthetic targets. The term natural product has also been extended for commercial purposes to refer to cosmetics, dietary supplements ...

Natural product - Wikipedia

Keywords antimicrobial, natural products, plant, animal, microorganisms. 1. Introduction Natural products are chemical compounds or substance produced by a living organism or found in nature that have pharmacological or biological activity [1]. Living organisms produce manifold primary and secondary metabolites.
