

nursing for public health pdf

Nursing skills are rightly valued as being able to provide meaningful public health interventions across all health and social care settings as part of holistic patient centred care. Nursing staff work in almost every stage and setting of health and care, and as such they have an important role across a wide range of public health interventions.

Public Health Nursing - Wiley Online Library

The goal of any community, or health care provider for that matter, should be to prolong the number of years of healthy life of the population it represents or cares for. With that goal in mind, people, social infra-structure, government aid to those most in need, and investigation of disease outbreaks may all play a role in the public's health. Public health uses the trends and occurrences ...
