world species of monilinia pdf

World species of Monilinia (fungi) Their ecology, biosystematics and control Published for: New York Botanical Garden; Collaborators: Mycological Society of America

World species of Monilinia (fungi) â€” Schweizerbart science

World species of Monilinia (Fungi): their ecology, ... The systematics portion includes 2 dichotomous keys: one that separates Monilinia from the related Sclerotiniaceae, and another that delineates the recognized species. The species are assembled in groups on the basis of the life cycles and the anatomy of entostromata. The entostromata in about half the species are hollow-sphaeroid, with an ...

World species of Monilinia (Fungi): their ecology

Monilinia pathogens of cultivated and native Vaccinium species in Slovenia Acta agriculturae Slovenica, 97 - 2, maj 2011 101 Table 1: Isolates of Monilinia species examined in the study

Monilinia ssiori sp. nov. in the Sclerotiniaceae, causing

PDF | In order to identify Monilinia species, the causal agents of fruit brown rot in Guilan province, the present study was carried out during 2005 and 2006. Diseased samples were collected from ...

(PDF) Identification of Monilinia species, the causal

283 genus Monilinia on Pome and Stone Fruit Species Jovana HrustiÄ±1, Milica MihajloviÄ±1, Mila Grahovac2, Goran DelibaÄ±1, Aleksandra BulajiÄ±3, Branka KrstiÄ±3 and Brankica TanoviÄ±1

genus Monilinia on Pome and Stone Fruit Species

Get this from a library! World species of Monilinia (fungi) : their ecology, biosystematics, and control. [Lekh R Batra; New York Botanical Garden.; Mycological Society of America.]

World species of Monilinia (fungi) : their ecology

Brown rot, caused by fungi belonging to the genus Monilinia, is one of the most important diseases of stone and pome trees in the world. During the summers of 2010 and 2011, a total of 670 Monilinia...

Characteristic of Monilinia spp. fungi causing brown rot

1 biological diversity and fungicide sensitivity of monilinia species in hungary thesis of phd dissertation anna IÃ•via lantos gÃ•dÃ•llÃ• 2016.

BIOLOGICAL DIVERSITY AND FUNGICIDE SENSITIVITY OF

Stone fruits are important in the agricultural economy of many countries; for example, the peach and nectarine world production reached 17 MT in 2011 (FAOSTAT, 2012) and, by calculating an underestimated average percentage of losses (10%) due to brown rot, Monilinia losses can account for 1.7 Mè•r/year for peach and nectarine alone.
